Saskatoon Business College

Security Remains the Top Concern for SMBs

Human Error

Recent statistics have shown that close to half of IT incidents in small and medium businesses are due to human error.

Permanent Threats

Office 365 is the most popular productivity SaaS worldwide. Cybercrime is a growing threat, especially ransomware.

User Miseducation

It takes just one uneducated or distracted user to open a malicious file that can harm an entire company.

Pricing

Companies of all sizes have access to cloud service security at an affordable price.

$1.25 cdn
per Office 365 seat
